"How much will I need?" is common question asked that can be worked out really simply.
 $\text{Length} \times \text{Width} \times \text{Depth} = \text{m}^3$
 For example, if you have an area 2mtrs in length, 1mtr wide and 0.5mtrs in depth you would multiply $2 \times 1 \times 0.5 = 1\text{m}^3$
 For advice on how much material you will need for your project, our sales team are here to help and can work out all your quantities. Just bring in your measurements.
